listed product families	website categories

How to use this catalog

Use the linked product-family page to review the current description and downloadable data sheet. Product codes are omitted from this index; confirm the ordered product by its approved drawing and quotation.

This catalog is a navigation aid, not a product-specific specification, test certificate, certification or assembly approval. Materials, dimensions, finishes, performance and document scope must be confirmed for the selected variant.

Screw families

Self-Drilling Screws (8)

Hex Washer Head Self-Drilling Screw with EPDM Washer Self-Drilling Screws	Product page
C1022A Torx Pan Head Structural Screw Self-Drilling Screws	Product page
Zinc-Tin Alloy Coated Self-Drilling Roofing Screw Self-Drilling Screws	Product page
Coated Carbon Steel #5 Drill-Point Screw Self-Drilling Screws	Product page
Pan Head Self-Drilling Screw for Bracket Fixing Self-Drilling Screws	Product page
Countersunk Rib Head Wing Screw for Timber to Steel Self-Drilling Screws	Product page
Large Diameter Self-Drilling Screw Self-Drilling Screws	Product page
Side-Lap Stitching Self-Drilling Screw, 6.8 mm x 20 mm Self-Drilling Screws	Product page

Bi-Metal Screws (2)

Bi-Metal Countersunk Self-Drilling Screw Bi-Metal Screws	Product page
Ruspert Coated 304 Bi-Metal Self-Drilling Screw Bi-Metal Screws	Product page

Self-Tapping Screws (4)

Hex Washer Head Self-Tapping Screw Self-Tapping Screws	Product page
Stainless Steel Self-Tapping Screw A2 / A4 Self-Tapping Screws	Product page
Sharp Cut-Point Self-Tapping Screw Self-Tapping Screws	Product page
Hi-Lo Thread Concrete Screw Self-Tapping Screws	Product page

Roofing and construction components

Flexible Roofing Fasteners (1)

Purlin Tail Screw for Flexible Membrane Roofing
Flexible Roofing Fasteners
Product page

Washers (4)

EPDM Sealing Washer with Bonded Metal Ring
Washers
Product page

Cyclone Washer for Profiled Roof Crest Fixing
Washers
Product page

EPDM Washer for Translucent Roof Panels
Washers
Product page

304 Stainless Steel Bonded EPDM Washer
Washers
Product page

Bolts (1)

Full-Thread Hexagon Head Bolt | DIN 933 / ISO 4017
Bolts
Product page

Deck Screws (1)

Carbon Steel Torx Decking Screw
Deck Screws
Product page

Specify the complete connection

Fastener selection depends on the connected layers and the complete assembly. Include the following information in a quotation or technical review:

- Product-family page, drawing number and revision, if available.
- Panel, board, bracket and support materials, grades and thicknesses.
- Fastening position, total build-up, required diameter, length, head, drive, point and washer.
- Site exposure, required coating or material compatibility and any specified test evidence.
- Quantity, packaging, destination and delivery requirements.

Review supporting evidence

- Check that each report identifies the proposed product variant and the tested substrate or assembly.
- Review the test method, sample, conditions, acceptance criteria and document date.
- Treat drilling, connection capacity, corrosion performance and sealing as separate checks.
- A product-family listing does not establish project design values or approval of a roof assembly.

Visit buildfastener.com for current product pages and contact the sales team with a drawing or application brief. Final variant, tolerances, performance, compliance, minimum order, samples, packaging and delivery terms are confirmed in the quotation.
